Docker Management

GET /is-docker-running Is Docker Running

GET /available-images/{image_name} Available Images

GET /active-containers Active Containers

GET /exited-containers Exited Containers

POST /clean-exited-containers Clean Exited Containers

POST /remove-container/{container_name} Remove Container

POST /stop-container/{container_name} Stop Container

POST /start-container/{container_name} Start Container

POST /create-hummingbot-instance Create Hummingbot Instance

POST /pull-image/ Pull Image

Manage Broker Messages

GET /get-active-bots-status Get Active Bots Status

GET /get-bot-status/{bot_name} Get Bot Status

GET /get-bot-history/{bot_name} Get Bot History

POST /start-bot Start Bot

POST /stop-bot Stop Bot

POST /import-strategy Import Strategy

Files Management

GET	/list-scripts	List Scripts		
GET	/list-scripts-configs	List Scripts Configs		
GET	/script-config/{script_name}	Get Script Config		
GET	/list-controllers	List Controllers		
GET	/controller-config-pydantic/{controller_type}/{controller_name}	Get Controller Config Pydantic		
GET	/list-controllers-configs	List Controllers Configs		
GET	/controller-config/{controller_name}	Get Controller Config		
GET	/all-controller-configs	Get All Controller Configs		
GET	/all-controller-configs/bot/{bot_name}	Get All Controller Configs For Bot		
POST	/update-controller-config/bot/{bot_name}/{controller_id}	Update Controller Config		
POST	/add-script	Add Script		
POST	/upload-script	Upload Script		
POST	/add-script-config	Add Script Config		
POST	/upload-script-config	Upload Script Config		
POST	/add-controller-config	Add Controller Config		
POST	/upload-controller-config	Upload Controller Config		
POST	/delete-controller-config	Delete Controller Config		
POST	/delete-script-config	Delete Script Config		
POST	/delete-all-controller-configs	Delete All Controller Configs		
POST	/delete-all-script-configs	Delete All Script Configs		

Market Data

POST	/real-time-candles	Get Candles		
POST	/historical-candles	Get Historical Candles		

Market Backtesting

POST /run-backtesting Run Backtesting

Database Management

POST /list-databases List Databases

POST /read-databases Read Databases

POST /create-checkpoint Create Checkpoint

POST /list-checkpoints List Checkpoints

POST /load-checkpoint Load Checkpoint

Market Performance

POST /get-performance-results Get Performance Results

Manage Credentials

GET /accounts-state Get All Accounts State

GET /account-state-history Get Account State History

GET /available-connectors Available Connectors

GET /connector-config-map/{connector_name} Get Connector Config Map

GET /all-connectors-config-map Get All Connectors Config Map

GET /list-accounts List Accounts

GET /list-credentials/{account_name} List Credentials

POST /add-account Add Account

POST /delete-account Delete Account

POST /delete-credential/{account_name}/{connector_name} Delete Credential

POST /add-connector-keys/{account_name}/{connector_name} Add Connector Keys
